THE CAPITAL GONE

AND THE STATE ARCHIVES GOING.

Charleston Gets the Seat of Government and Wheeling a Handsome City Mail.

The State House dismantled and the Steamers to Sail.

For the second time in the existence of the State of West Virginia Wheeling today loses the distinction of appearing in the geographical designations by a star. Hereafter she will be a simple round dot.

In other words, Wheeling last evening at the close of business ceased to be the Capital of the Mountain State, and on and after to-day Charleston will be the permanent seat of government and people having official business with any of the State departments, if unfortunate enough to live anywhere but in the southern end of the State, will be obliged to go out of the State to get to the seat of government.

The State archives, Government property and State House furniture have all been loaded upon the steamer Chesapeake and the model barge Nick Crawley. The latter is packed to its utmost holding capacity. The Belle Prince, having the barge in tow, will leave the wharf this morning at an early hour for Charleston.

The Chesapeake, bearing Governor Wilson, Auditor Duffey, Treasurer Thompson, Superintendent of Free Schools Morgan, Superintendent of State Walkers, and the Great Seal of the State, will depart at 10 A. M. The clerks and a few outsiders, in all about twenty-five gentlemen, will also be passengers.

Capt. Billy Prince will command the Chesapeake and Capt. Kugler the Belle Prince. Large canvas signs will be decorated the sides of the barge and steamers, to inform the natives along the Ohio and Kanawha that this is the West Virginia Capital in transit.

It is a considerable talk about the thorough manner in which the State House has been dismantled. Some surprise has been expressed that the doors were left, and it is frequently remarked that the city should be grateful that the building is left. Much of this feeling is without cause, but it is rather surprising that the shelling was taken from the vaults. These pine boards will not fit anything at Charleston, and will doubtless be used for kindling wood. The vaults the vaults they would have saved the city some expense.

Hereafter the State House is the City Hall. The city probably gains more substantial good than this loss.

THE NEW CITY HALL.

Apportioning its Space Among the Various Officials.

Yesterday morning, the special Council committee appointed to arrange for occupying the State House building, met there for the purpose of apportioning the rooms off for the various city departments and ascertaining what would be necessary to have done in order to make the place habitable. Those present were Messrs. Myles (chairman), Dobbin, McGregor, Gruse and Peterson. Mr. Shanley was absent.

The committee will recommend the following arrangement: That the large south west corner room be reserved for the police court; this room was formerly used by the public library and is well adapted for the purpose named. That the large room opposite this, and under the dome formerly occupied by the State Treasurer, be reserved for the City Clerk, and that it be fitted up with the necessary cages. The idea is to have these cages occupy the centre of the room with a passage way all around. That the two adjoining rooms, now those formerly occupied by the Superintendent of Free Schools, be devoted to the use of the look-up keeper. That the large room, formerly occupied by the Treasurer and the two rooms occupied by the Superintendent of Free Schools, be reserved for the use of the City Clerk, and that it be fitted up with the necessary cages. The idea is to have these cages occupy the centre of the room with a passage way all around.
